Panel	Full Name	Institution
Atomic, Molecular, Optical and Cluster Physics (AMO)	Lou Barreau	Université Paris-Saclay
	Gilles Doumy	Argonne National Laboratory
	Kenichi Ishikawa	University of Tokyo
	Franck Lépine	Claude Bernard University Lyon 1
	Tommaso Mazza	EU XFEL
	Antonio Picón Alvarez	Instituto de Ciencia de Materiales de Madrid (ICMM-CSIC)
	Kirsten Schnorr	Paul Scherrer Institute
	Niranjan Shivaram	Purdue University
	André Staudte	NRC and University of Ottawa
	Thorsten Weber	Lawrence Berkeley National Laboratory
Crystallographic Structure Determination of Biological Objects (BIO-C)	Jonathan Clinger	Baylor University
	Barbara Golden	Purdue University
	Marcia Newcomer	LSU, NSF program manager
	Dominik Oberthuer	CFEL
	Doug Rees	CalTech
	Marjolein Thunnissen	MAX IV
	Martin Weik	Institut de Biologie Structurale
	Jennifer Wierman	Cornell, MacCHESS
	Mark Wilson	University of Nebraska–Lincoln
X-ray Scattering, Spectroscopy, or Single Particle Imaging of Biological Objects (BIO-S)	Kartik Ayyer	Max Planck Institute for the Structure and Dynamics of Matter
	Johan Bielecki	European XFEL
	Filipe Maia	Uppsala University
	Stephen Meisburger	Cornell, MacCHESS
	Carolin Seuring	Universität Hamburg
Chemistry, Soft Condensed Matter & Disordered Materials (CSD)	Musahid Ahmed	Lawrence Berkeley National Laboratory
	Giulio Cerullo	Politecnico di Milano
	Majed Chergui	ELETTRA Sincrotrone Trieste
	Wojciech Gawelda	Universidad Autónoma de Madrid
	Niranjan Govind	Pacific Northwest National Laboratory
	Kristoffer Haldrup	Technical University of Denmark, DTU
	Nils Huse	U. Hamburg
	Zhi-Heng Loh	Nanyang Technological University
	Christopher Milne	European XFEL GmbH
	Benjamin Van Kuiken	EU XFEL
	Josh Vura-Weis	U Illinois
	Julia Weinstein	University of Sheffield
Gas-Phased Photo-Chemistry (GPC)	Basile Curchod	University of Bristol
	Loren Greenman	KSU
	Heide Ibrahim	INRS
	Rebecca Ingle	University College London
	Till Jahnke	European XFEL
	Michael Schuurman	uOttawa
	Hans Jakob Wörner	ETH
	Haiwang Yong	UCSD
Materials-Hard Condensed Matter (HCM)	Martin Beye	Stockholm University
	Simon J. L. Billinge	Columbia
	Yue Cao	Argonne National Laboratory
	Mark Dean	Brookhaven National Laboratory
	Jure Demsar	Johannes Gutenberg-University Mainz
	Andrea Eschenlohr	U. Duisberg-Essen
	Paul Evans	University of Wisconsin-Madison

	Michael Först	Max Planck Institute for the Structure and Dynamics of Matter, CFEL
	Simon Gerber	Paul Scherrer Institut
	Emmanuelle Jal	Laboratoire de Chimie Physique -Matière et Rayonnement Sorbonne Université
	Anders Madsen	EuXFEL
	Sujoy Roy	Lawrence Berkeley National Laboratory
	Andreas Scherz	EU XFEL
	Samuel Teitelbaum	Arizona State University
	Michael Zürch	UC Berkeley, Chemistry
Methods and Instrumentation (M&I)	Laura Foglia	Elettra
	Adrian Mancuso	Diamond Light Source
	Uta Ruett	SLAC National Accelerator Laboratory
	Andreas Schropp	DESY
	Kenji Tamasaku	RIKEN
High Energy Density Science/Matter in Extreme Conditions (MEC)	Tommy Ao	Sandia National Laboratories
	Alexey Arefiev	UCSD
	Leora Dresselhaus-Marais	Stanford University
	Tilo Döppner	Lawrence Livermore National Laboratory
	Andy Higginbotham	University of York, UK
	Matthew Hill	Lawrence Livermore National Laboratory
	John Kline	Los Alamos National Laboratory
	Sébastien Le Pape	LULI
	Sophia Malko	Princeton Plasma Physics Laboratory
	David McGonegle	Atomic Weapons Establishment/University of Oxford
	Silvia Pandolfi	Sorbonne Université
	Toma Toncian	Helmholtz-Zentrum Dresden-Rossendorf
	Thomas White	University of Nevada, Reno
	Heather Whitley	Lawrence Livermore National Laboratory
