

## UEC Teleconference – July 13<sup>th</sup>, 2018

Attendees: Lin Chen, Arianne Gleason, Christoph Bostedt, Petra Fromme, Bruce Doak, Félicie Albert, Klaus Sokolowski, Artem Rudenko, Lois Pollack, Leilani Conradson.

Mike Dunne not available.

### Users' Meeting

Ari reviewed LCLS Workshop structure, e.g., Plenary talks in the AM Wed and Th and afternoon workshops

Ari reminded UEC to sign up for guest house.

### SAC Meeting

Christoph reported back from SAC mtg:

- R&D well funded and at high level
- Recommendations for high level investment
- Encouragement of early user science – have proposals ready to take advantage of Cu linac and not to lose progress in LCLS I.

- Strategic access proposal (SAP) for longer term access should have a good model; do not necessarily include the SAC in this process; to be judged, driven and evaluated by an extended PRP.

Discussion among UEC regarding SAP; there should be judgment for SAP access based on 2 merit criteria:

1. collaboration in developing new capabilities for the facility for all users
2. is a longer term access strategy really critical for the science program

### Discussion of CoI

Discussion of potential perceived COI with Ari now holding a job at SLAC. Decision was made to have UEC members vote on this and email Christoph and Leilani their opinion of Ari.
